Company Overview

The Company was incorporated under the provisions of the B.C. Business Company Act on October 23, 2007. In May 2014 the Company voluntarily delisted its common shares from the TSX Venture Exchange ("TSXV") and commenced trading on the Canadian Securities Exchange ("CSE"). On May 30, 2014 the Company changed its name from CuOro Resources Corp. to Rockshield Capital Corp. with the CSE trading symbol of "RKS". The Company is a reporting issuer in British Columbia and Alberta. The Company's principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7.

The Company had been solely engaged in the acquisition and exploration of resource properties in Colombia. On May 6, 2014 the Company announced its intention to become a diversified company and carried on business both as an investment company and a resource company. At the end of fiscal 2015 the Company determined it would not follow-up on the application process on the two concessions (the "Pelaya Project") in Colombia and, as a result, at this time, the Company has no continuing resource activities or interests.

Investments

In fiscal 2014 the Company determined to diversify its business and seek opportunities in the investment sector with a particular focus on investments in early stage, high growth companies at all stages of development, including pre-initial public offering and /or early stage companies requiring start-up or development capital. The Company's investments in marketable securities include common shares and other equity instruments of Canadian and U.S. companies that are listed on various Canadian stock exchanges or the OTCBB in the United States of America. The majority of the marketable securities instruments are shares of companies in the mining, oil and gas, media technology and medical technology industries.

Management has designated its investments in common shares and warrants of publicly traded companies as "investments in equity instruments" with the change in fair value recognized in profit or loss. The carrying values of the common shares have been directly referenced to published price quotations in an active market. The carrying values of the warrants are valued at fair value using the Black-Scholes option pricing model.

During the three months ended February 29, 2016 the Company sold certain of its investments for proceeds of \$102,347 (2015 - \$23,510) and recognized a loss of \$30,346 (2015 - of \$2,965). In addition, as at February 29, 2016 the Company has recorded an unrealized loss of \$783,138 (2015 - gain of \$854,793) on investments held.

As at February 29, 2016 the Company's investment portfolio and the carrying values are as follows:

Investment in REWP

In fiscal 2014 the Company, together with a third-party industry management and investment group, identified a business opportunity in northern Ontario, Canada, to purchase the assets of a previously operating hardwood plywood mill. The mill went into bankruptcy in May 2014 and the Company and the third party group worked to purchase the key mill equipment to enable operations to resume. As at November 30, 2014 the Company had advanced or incurred \$1,240,935 in deposits, equipment and costs towards its investment in the newly formed company, Rockshield Engineered Wood Products ULC ("REWP"). During fiscal 2015 the Company incurred \$240,972 additional amounts on behalf of REWP and advanced a total of \$400,000 to REWP. On February 18, 2015 REWP issued 2,076,079 Class A common shares, representing an initial 59.32% ownership, for \$1,500,000, and an initial note for the principal amount of \$381,907 to the Company. During fiscal 2015, additional advances were made by the Company and REWP issued additional notes for \$216,596.

Although the Company owned an initial 59.32% interest in REWP upon its initial capitalization the Company held a minority position on the Board of REWP and did not control operational decisions. Furthermore, REWP has subsequently completed a number of equity financings which have diluted the Company's ownership interest in REWP to 33.72%. The Company anticipates that it will receive distributions of net income and the Company also anticipates to realize proceeds from the ultimate disposition of its ownership interest in REWP. The Company's judgment is that it has significant influence, but not control of REWP and, accordingly, the investment in REWP is accounted for under the equity method.

The notes bear interest at an interest rate of 18% per annum, compounded monthly. Notes of \$523,503 are due and payable within 30 days from the date that the Company demands payment. The remaining \$75,000 of the notes are due and payable within 30 days from the date that the Company demands payment, but not prior to April 30, 2016. During the three months ended February 29, 2016 the Company recorded \$10,772 of interest income attributed to the notes.

REWP's business is to produce aspen core hardwood plywood for domestic and international markets. The core blanks of the products are made with aspen logs from sustainably managed forests in Northern Ontario. The majority of the panels will be hardwood plywood to which REWP adds a hardwood veneer, such as oak, cherry, maple, birch, etc., as an overlay to produce ready-to-use panels.

Since its formation REWP management has diligently worked towards raising debt financing and equity capital, obtaining government assistance, securing log supply and start-up of the plywood mill. Operating permits were obtained in February 2015 and operations commenced in late April 2015. REWP management has reported that operations are steadily improving with a steady month-to-month increase in sales and pricing for its products REWP expects continued sales growth throughout fiscal 2016.

The primary factors for the increase in loss during Q1/2016 were:

The increase in loss was primarily attributed to the Company recording a loss during the 2016 period of \$783,138 on investments held and a realized loss of \$30,346 on investments sold compared to an unrealized gain of \$854,793 on investments held and a realized loss of \$2,965 on investments sold during the 2015 period.

- (v) \$2,399 (2015 - \$6,691) was incurred for travel, a decrease of \$4,292. The decrease in the 2016 period was mainly due to increased management’s trips related to the Company’s investment in REWP during the 2015;
- (vi) during the 2016 period the Company was billed \$4,756 by Mr. Taggart, the Company’s CEO, for office rent in Panama; and

Financial Condition / Capital Resources

Since inception the Company’s capital resources have been limited to amounts raised from the sale of common shares in the Company.

The Company was a junior mineral exploration company that had been solely engaged in the acquisition and exploration of resource properties in Colombia. On May 6, 2014 the Company announced its intention to become a diversified company and carry on business both as an investment company and a resource company. During fiscal 2015 the Company determined it would not follow up on the application process on the Pelaya Project. In addition to its ongoing investment activities, the Company continues to investigate and consider additional opportunities in the resource and other sectors that can bring value to the Company and its shareholders.

As at February 29, 2016 the Company had a cash balance of \$1,697,968. The Company also has investments in marketable securities carried at \$2,674,817. See also “Investments”. Any investment decision made by the Company will be dependent on its cash and working capital situation at the time. In addition, any other opportunities completed by the Company may entail significant expenditures and, as a result, the Company may be required to obtain additional financing or sell its investment in marketable securities as required. The Company’s operations have been funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. In addition, the investments in marketable securities are comprised of common shares in early stage development and the share prices are often volatile and there may be limited liquidity. Management considers the Company has adequate resources to maintain operations, investment activities and planned exploration activities on its exploration and evaluation assets for the next twelve months.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

Proposed Transactions

The Company does not have any proposed transactions.

Fair Value

The fair values of the Company’s financial assets and liabilities approximates the carrying amounts either due to their short-term nature or because the interest rates applied to measure their carrying amount approximate current market rates.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 - Inputs that are not based on observable market data.

The following is an analysis of the Company’s financial assets measured at fair value as at February 29, 2016 and November 30, 2015:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and amounts receivable is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash and demand deposits bear floating rates of interest. The interest rate risk on cash and subscription held in trust and on the Company's obligations are not considered significant.

(b) Equity Price Risk

The Company holds investments in publicly traded equity securities. Market prices for equity securities are subject to fluctuation and consequently the amount realized in the subsequent sale of an investment may significantly differ from the reported market value.

The Company intends to hold its long-term investment for a long period of time so the Company is not affected by short-term price volatility with respect to the investment provided that the underlying business, economic and management characteristics of the investee remains favorable.

(c) Concentration Risk

As at February 29, 2016, \$1,655,659 of the Company's portfolio of investments was held in one company. This investment represents 61.9% of the Company's total assets and poor performance in the market price of this investment could adversely affect the Company's results. See also "Investments".

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support its investment and resource activities. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital. The Company will continue to assess new investment and property acquisition opportunities as opportunities arise and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There have been no changes to the Company's approach to capital management during the three months ended February 29, 2016. The Company is not subject to any externally imposed capital requirements.
